CARBON FIBER reinforced on the inside

carbon is a strong material and a reliable partner in construction.

QUICK SET UP practical solution

An ideal solution for both professionals and amateurs who want to build a strong, fair facing finish pillar that will last them a lifetime.

RUST-FREE innovative material

The reinforcement is made out of carbon which is why its rust-free and resistant to all weather conditions: sea water, acid and alkalis.

"TAKE IT AND GO" a quick solution

Take your **solidian TUBE** off the shelf and you can start your construction work right away because all the necessary components are already in the tube.

SIMPLE DELIVERY save money

solidian TUBE is much lighter, but 6-7 times stronger than steel! This not only saves you money, but also simplifies delivery and storage.

LIFETIME SOLUTION WITH CARBON REINFORCEMENT

- carbon reinforcement
- specially formulated epoxy resin
- rust-free
- 6-7 times stronger than steel
- alkali-resistant
- acid-resistant
- life-time guarantee reinforcement
